

SKU: 220 H-200 SAP IV E-1500

Pressure - 11605 psi
Flow - 101 L/min
Speed - 1500 RPM

Features

- A new series of high pressure pumps
- HPP is a Comet SpA brand specialized in the design and construction of plunger pumps for water, made even better thanks to its technological expertise and further boosted by modern day technologies. This means the company is able to offer a wide range of products to meet requirements that go from 50 to 400 kW with pressures up to 2800 bar.
- The most modern technologies
- HPP pumps are manufactured using the most modern technologies both as regards to the materials used machining and mechanical operations and heat treatments.
- Comet is also able to provide a wide range of accessories, suitable for the specific needs of the single user. Professionalism and research make it a dynamic modern company intent on tackling and resolving the problems of a fast-evolving market.
- Tungsten carbide plunger - Forced Lubrication and Heat Exchanger

Specifications

- **HPP Model** - P232052V14300
- **HPP Code** - N/A
- **Speed** - 1500 RPM
- **Flow** - 101 L/min
- **Pressure** - 11605 psi
- **Power** - 201 hp
- **Diameter** - 30 mm
- **Gear Ratio** - 3.1
- **Assembling** - Vertical
- **Weight** - 500 kg
