

HYDRO EXCAVATION NOZZLE - MACHETE FINISHER - HYDRA-FLEX

3,200 PSI Max Stainless Steel Housing 1/2" FNPT Inlet

Features

- **SUPERIOR PERFORMANCE** – The Machete™ blasts a 0-degree water stream that oscillates at an optimal speed creating a 15-degree wedge of powerful flow. This will allow you to dig faster in the hardest and most compact soil types. By harnessing the power of a straight tip nozzle while oscillating, it creates a superior tool for trenching capabilities.
- **RUGGED & REPLACEABLE** – This heavy duty, high impact nozzle is constructed of a stainless-steel housing and tungsten carbide wear surface. Lab validated to outlast other Hydra-Flex nozzles, the Machete can withstand harsh environments and provides a longer run than ceramic nozzles. The Machete also has a replaceable nylon cover that allows instant changeability while increasing the overall core nozzles' life cycle.
- **SAFETY** – The unique oscillation design of the nozzle helps reduce undermining that may occur when using traditional rotating nozzles ensuring the operator's safety. Continued use of the nonconductive cover on the nozzle body protects users and sensitive underground utilities.
- **EFFICIENCY** – The machete is a finishing tool for any job, whether it's trenching or cutting through compact soils. With a controlled oscillation that is faster than traditional nozzles, it allows you to save even more water.

Specifications

- **Minimum Pressure:** 1,000 PSI (69 bar)
- **Maximum Pressure:** 3,200 PSI (220 bar)
- **Nozzle Size:** Variable
- **Maximum Temperature:** 180°F (+82°C)
- **Housing Material:** Stainless Steel
- **Coating Material:** ST Nylon 1000
- **Nozzle Tip & Seat Material:** Tungsten Carbide

Recommended Accessories

- **Hydro-Excavation Nozzle - Green - Ripsaw**

HYDRO EXCAVATION NOZZLE - MACHETE FINISHER - HYDRA-FLEX

- Inlet Connection Thread: 1/2" FNPT
