

MUSTANG JETAXE NOZZLE - COMPLETE **BAR**

SKU: 165 JA8RC

"Axe" style front blade to chop into a blockage

Feature

- The **Jetaxe Nozzle** from **Mustang** is an awesome nozzle for those really tough blockages.
- Using the same rear jet configuration as the Grease Ball nozzle, it has extreme thrust with a tight 20-degree rear jet angle.

Versions

- JA6R1F has one forward straight jet drilled at .6mm allowing it to break up debris with both the blade and the jet, plus 6 rear jets for thrust
 - JA8R has no front, concentrating on pure thrust letting the axe head do all the work!
