

TURBO NOZZLE - DIRT KILLER - WATER CANNON

3,200 PSI Max Pressure 1/4" BSP F Inlet Select Your Nozzle Size

Features

- Blast dirt, grime, slime, mold, mildew, etc. off instantly using the Dirt Killer nozzle. Save chemicals, water, time and money.
- The Dirt Killer generates a whirlwind of water droplets so powerful that the embedded dirt is blown away.
- These nozzles, which feature a rotating turbine, deliver the punch of a zero degree nozzle with a 25 degree fan, creating 10 times the cleaning impact of a standard flat tip nozzle, effectively cutting cleaning time in half.
- The DK series is the ideal cleaning nozzle. With its unique, high speed spinning head, it gives a less powerful machine the impact of a more powerful industrial pressure washer.
- The DK, unlike some rotary nozzles, leaves no unsightly pressure washing lines on the surface it is cleaning and it is safe for use in sensitive industrial areas.
- Applications include brick cleaning, kennels, paint and graffiti removal, removal of mildew from stucco, concrete and wood decks. The nozzles can also be used for the removal of gum from sidewalks and boat cleaning with barnacle removal.

Specifications

- **Inlet:** 1/4" BSP F
- **Nozzle Size:** Variable
- **Maximum Pressure:** 3,200 PSI
- **Maximum Temperature:** 82°C
- **Performance:**
 - At 3000 PSI approximately 250 to 400 hours
 - At 2000 PSI approximately 300 to 500 hours
 - At 1000 PSI approximately 400 to 700 hours before rebuilding or replacement is necessary

Service Advisory

- Using a high pressure filter increases the life of the DK

TURBO NOZZLE - DIRT KILLER - WATER CANNON

nozzle. When using with hot water, it is strongly recommended you use the filter and lubricate the nozzle every 2 to 3 hours with a teflon blended oil. These nozzles work best with pressure regulated unloaders. Do not touch rotating water pattern. Always start with the nozzle pointing towards the ground.
