

ASSEMBLY INSTRUCTIONS

Lithium Ion battery 1.6 Ah 12 V

CAUTIONS

1. Do not expose battery to temperatures above 60 C (140 F).
2. Do not reverse the positive (+) or negative (-) terminals or short-circuit the battery in any way.
3. Do not allow charge voltage in excess of 15 V.
4. If the battery becomes hot to the touch, stop charging. Allow battery to cool before charging.
5. Do not open, disassemble or modify the battery in any way.
6. Do not connect the battery to other batteries in any way.
7. Do not over-discharge the battery. It may damage the battery or shorten the battery life.
8. A flammable hazard may exist if the battery is physically damaged.
9. Failure to follow these instructions may present risk of explosions, fire or high temperatures.
